

WATER & WASTEWATER OPERATIONS

Providing water and wastewater facilities operation, maintenance, and monitoring (O&M) services for a multitude of clients.

A white Ford F150 pickup truck is parked on a dirt lot. The truck has a large decal on the driver's side door. The decal includes the Broadbent logo, the company name "BROADBENT", the tagline "Creating Solutions. Building Trust.", and the services "ENVIRONMENTAL · WATER RESOURCES · ENGINEERING". At the bottom of the decal, the phone number "830-816-5434" and the website "broadbentinc.com" are listed.

WATER & WASTEWATER OPERATIONS CAPABILITY STATEMENT

Broadbent provides water and wastewater treatment system operation services to a wide range of clientele across the western United States. Our team is comprised of certified operators and licensed engineers that work together to deliver safe and reliable operations. We are known in the industry for our ability to troubleshoot and optimize systems, and we know how to efficiently design and implement modifications when necessary. We also provide emergency response support to restore systems to their original operational state when unforeseen conditions arise.

In addition, we offer specialty operator services for more complex treatment systems employed in various mining and industrial applications. Sulfate Reducing Bioreactors (SRB) and High-Density Sludge (HDS) plants are a few examples.

SERVICES

- Certified operators for potable water distribution and treatment
- Certified operators for wastewater treatment
- Modification design and implementation
- Operation, maintenance, and monitoring of treatment facilities
- Permit compliance monitoring, sampling, and reporting
- Regulatory liaison services
- Troubleshooting and optimization
